Very much in favor of the long trench solution. The current Tamarack railroad crossing is very dangerous for several reasons.

1. High volume of vehicular traffic.
2. High volume of pedestrian and cycling traffic using Tamarack to get to and from the beach.
3. Unusually high volume of pedestrians (many young children, teens and families) and cycling traffic entering and exiting the coastal rail trail at Tamarack which is located right next to the Tamarack crossing gates. This situation is extremely dangerous!
4. There obviously will be increased train traffic in the coming years.
5. When looking at the total scope of the overall cost, community safety, and the construction timeline of this project the long trench solution really is a no brainer!

Thank you.

Richard and Donna Hadley

Carlsbad City,

We are in favor of the LONG TRENCH SOLUTION for the train tracks. Having an overpass for Tamarack and Carlsbad Village is the best solution.
