Dear city council,

I live in the city of Carlsbad, unlike all of Carlsbad's elected officials. I am strongly opposed to the city enacting any enhanced facial covering rules. I am also strongly opposed to using law enforcement to enforce a city rule regarding masks. In an age in which cities are encouraging law enforcement to only enforce real crimes, having them stop a person for not wearing a mask is absolutely ludicrous. This is not a police function and not one dollar of my tax money should be used to enforce this asinine idea.

Thanks for the consideration.

Thank you,

Jamie Harrison

To all the City Council Members,

I'm writing today to voice my concerns and feelings about the enforcement of Facial Coverings at the beaches and Businesses.

This is absolutely unnecessary and been time and time again scientifically proven not to stop the spread of this virus! We have also found that the sun (UV and Vitamin D) pretty much kills the virus. Making us wear a mask outside in the sun, is making our immune system worse and it ultimately make us sicker than them protecting us. There is also no reason to spend our tax dollars on having our Police enforce this absurd mandate. Our Police should be spending they're time protecting against crimes around our beautiful city to keep it safe!

One last comment. Mrs. Schumacher, herself, uses a "medical exemption " to keep herself from being made to wear a mask! That should tell you all everything you need to know about rejecting this mandate!

Thank you for your time,

Scott Pastore

Dear Carlsbad City Council,

My email relates to an agenda item # ³ and I desire to have the email read into the record at the City Council meeting Sept 22.

Please consider the science! Our COVID numbers do not warrant the start of enforcing mask-wearing outdoors. What a waste of money and resources it would be to pay our valuable police to do so. We are confused as to why the city would put money into that rather than into HELPING IT'S CITIZENS, such as those who own small businesses. If people can no longer make a living, then it's much more likely they will not be able to afford proper healthcare, including preventative care. Businesses dying left and right is extremely more hurtful to our safety and health than the risk of healthy people contracting COVID19 virus at the beach. The numbers speak for themselves... Let's start focusing our resources on the livelihoods of our citizens rather than trying to scare healthy people into submission. This is common sense if you study the actual science and numbers for Carlsbad.

Darcie & Jeremy Paul

We residents of Carlsbad need 2 put a stop 2 this ridiculous mask wearing in our city. "This idea is absurd & shows that the objective is all 'bout stealing from the residents of Carlsbad. We all have natural rights to choose to stay well or not. It's our choice 2 do what we choose !

I'm writing to express my frustration and disappointment in Carlsbad for even considering agenda item #3, enforcing mask wearing outdoors, like at the beach. Furthermore, the council is considering moving police funding to mask enforcement and mask education. This is OUTRAGEOUS! I understand council member Cori Shumaker to be behind this agenda item. Could it be that Cori needs to deflect attention from the fact that she should be investigated for quid pro quo with her PLA push tied to the CEA issue?

If that's not the case, let's get back to the masks alone. It is interesting that Cori wants everyone to mask up, and worse, create enforcement of mask wearing when she herself has an exemption for wearing a mask. The hypocrisy here is hilarious!

Please, take yourselves seriously. Take your citizenry seriously. We do not want to spend time or money enforcing mask wearing OUTSIDE AT THE BEACH or anywhere else outdoors. There's a Boston University Medical study that recently came out saying Vitamin D greatly reduces one's risk of getting COVID-19. Eghad! What will Cori do now? A scientific study determined that sun exposure, in other words - being outside, greatly reduces your chance of getting COVID. The study further explains that people need to expose their skin to the sun in order for the body to produce a therapeutic amount of Vitamin D. Meaning, take the mask off and let the sun shine down on you in order to stimulate your immune system.

Is the city council going to continue to consider the ridiculous ideas that come out of Cori's mouth? Please, restore faith in reason, science and critical thinking skills by killing agenda item #3.

Thank you,
Jen Belnap

Dear City Council members,

I am appalled by the notion that a \$70,000 mask enforcement and education will be brought to the table today. DO NOT APPROVE, we as taxpayers do not consent to being harassed. Most physicians believe outdoors, fresh air, vitamin D to be beneficial to your health. Mask wearing is unnecessary when outdoors and teaching the public otherwise is against science and common sense. Please follow the CDC recommendations and newest updates as we have better information on the virus now.

Please stick up for the majority and not the cranky, loud minority who would have us all masked indefinitely.

Jessica Price

NO to police at the beach educating about masks. This is Carlsbad, not Gestapo Germany.

Subject: Sept. 22. Agenda Number 3 Facial Coverings

All Receive - Agenda Item # 3
For the Information of the:
CITY COUNCIL
Date 9/22 CA CC
CM ACM DCM (3)

Good Afternoon,,

I am writing today in support of Ordinance number 3- Enforcement of Facial Coverings in high traffic areas. Since June the City of Carlsbad has engaged in a variety of educational efforts, and yet it seems to be of no avail. When driving through the downtown area, it is obvious most are not wearing facial coverings. When this pandemic first started there was a variety of ideas regarding the use and effectiveness of wearing facial coverings/ masks. This was due to lack of information on how the disease was spread. Now months later, through a variety of scientific studies, we are aware that until a vaccine is available the only recourse we have to mitigate infection is the use of social distancing and facial coverings. In many areas downtown, you can not social distance adequately. Infectious disease experts emphasize that the probability of infection is almost nil when all parties are wearing a mask. If we as a community want to preserve our downtown businesses, and return to some semblance of normal, we must stop pandering to the nonsense promoted by anti mask people. I ask that you take into consideration enforcement of facial coverings in the high traffic areas of downtown and the beach stairways.

Susan Gutierrez
