Agenda item #8

Good morning. I'm submitting a request to please commit to electrification moving forward in Carlsbad. If we learned anything during our global pandemic - it's that we must act quickly in response to science and technology and make responsible, informed decisions moving forward. We are counting on you - our trusted representatives- to help layout proper guidelines for a safe future. Gas powered utility is dangerous and obsolete and no longer an option to provide power at the cost of destroying our community. Electrification is here! We must act responsibly today. Make the commitment. Lead us into a future you can be proud of. There is one planet earth and no time to hesitate or wait. Clean electric power has arrived and we must commit to this technology throughout Carlsbad now. Thank you for your thoughtful vision and important leadership.
